

The graph illustrates the daily height of the mountain in meters. The y-axis represents height in meters (1k to 5k), and the x-axis represents the day (1 to 11). The height starts at 2610m on Day 1, rises to 3440m on Day 2, remains at 3440m on Day 3, increases to 4040m on Day 4, 4470m on Day 5, 4750m on Day 6, and reaches its peak of 5357m on Day 7. From Day 7, the height decreases to 4750m on Day 8, 4380m on Day 9, 3440m on Day 10, and finally 2860m on Day 11.

Day	Height (m)
1	2610
2	3440
3	3440
4	4040
5	4470
6	4750
7	5357
8	4750
9	4380
10	3440
11	2860
